

BIODIESEL

IN THREE EASY STEPS

1

Educate yourself about Biodiesel frequently asked questions at www.biodiesel.org.

2

Call your current fuel distributor and order a Biodiesel blend (2%, 10%, 20%) and discuss pricing with the newly enacted state and federal tax credits.

3

Inform your drivers and technicians that the next load of fuel will be Biodiesel and they may notice a difference in smell and should spot check fuel filters for first couple of loads of fuel.
